Craft- How to make a Chinese Lantern

In today's story the four friends helped the paralysed person to find the way to where Jesus was. In China, paper lanterns are used to light up the streets during festivals or to mark the way home. Today we make a paper lantern to remember how we can light the way to Jesus for people.

To make your Chinese lantern you will need:

- A4 sheets of coloured paper
- Scissors
- Glue
- Stapler
- Glitter
- String

Use the provided template or follow the steps:

- 1. Fold a sheet of green or red coloured paper in half lengthwise.
- 2. Cut with scissors from folded edge to 3cm from open edge.
- 3. Open out and join along short sides with glue or staples to make a tube
- 4. Add a handle to the top and insert a contrast tube of yellow coloured paper so it looks like it is glowing.
- 5. Decorate your lantern by adding tassels or glitter.
